

SUPPLEMENTARY INFORMATION:

Background

The Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), as amended by the Sustainable Fisheries Act of 1996, requires that the Councils minimize, to the extent practicable, adverse effects of fishing on habitat. The Magnuson-Stevens Act further stipulates that fishers and other interested parties be involved in this process. The purpose of these meetings is to inform the Councils and to involve interested parties early in the process of addressing the effects of fishing on habitat. The process begins with a synthesis that surveys and assesses all available information through the scientific literature concerning adverse effects of fishing. The draft synthesis is being presented and discussed at these public meetings. The final synthesis document will be available to Councils and other interested parties for use in addressing adverse impacts from fishing gear within fishery management plans.
